Delphi

All MAKES NOZZLES CATALOGUE

Delphi

Cleaner.
Better.
Further.

Delphi Automotive traces as its earliest antecedent the New Departure Bell Company, founded in Bristol, Connecticut, in 1888 to manufacture the earliest known doorbell-ringing device. The company's talent for innovation soon extended to transportation, with the 1897 introduction of the first bicycle coaster brake.

Other Delphi predecessors have been involved in automobile lighting since 1906 and manufacturing wooden auto bodies beginning in 1908. In 1908, Albert Champion, who had been making spark plugs in America since 1899, joined Buick Motor Co. to make spark plugs in the AC Spark Plug Division, which was acquired by General Motors founder Billy Durant in 1909. Durant acquired Dayton Engineering Laboratories, which would become Delco, in 1914.
For more than a century, Delphi, as a leader in propulsion systems, is committed to provide Innovative and Sustainable Solutions in the Automotive industry. Our goal is to make automobiles cleaner, better and further.

With our experience as a renowned Tier-1 supplier in Automotive industry, Delphi is introducing its All Makes Solutions for Internal Combustion Engine applications. We bring forth our diverse product portfolio to serve wide range of On & Off-Road vehicles in the market. From complete fuel injection system to parts components, we are always staying ahead of market trend in Maintenance, Repair and Overhaul (MRO). With strong foundation and experience in Original Equipment Manufacturing (OEM), we are offering more high quality products and solutions to meet and exceed the market expectations.

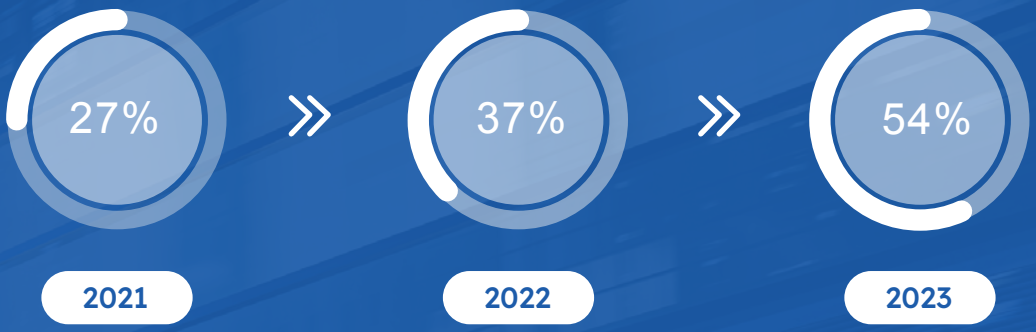

PHINIA

Delphi

Delphi will continue to invest in developing new and high quality products to stay abreast of time to meet our customers' requirements in Automotive Aftermarket.

Part number coverage

Inventory coverage

Old friend, new face - Delphi diesel nozzle packaging upgrade

Delphi Logo.

Tamper Evident Cap; still airtight when re-fitted.

Tamper-evident Cap; Airtight – Protection against corrosion during transportation and storage.

Individual label containing complete product data, including barcode.

Clear label with product information and barcode. Added security features against counterfeit.

Consistent format and image.

Packed in clean room environment.

Hartridge equipment is suitable for Delphi all makes nozzle, recommended for you.

*Image is for reference only, please refer to the actual product

PHINIA

Delphi

Original equipment workmanship

Original equipment-level technology and installation performance.

Strict process controls

Globally standardized and strict process controls based on the original manufacturer's standards, to ensure excellent product quality.

The product is certified by third-party international testing agencies, providing more assurance for long-term use.

Hartridge equipment is suitable for Delphi all makes nozzle, recommended for you.

*Image is for reference only, please refer to the actual product

Superior product performance

Item	Original equipment standard	Delphi	General domestic brands
Leading design/Production/ Technology standards for quality control	JIS globally standardized technical regulations	GTR globally standardized technical regulations	Uncertified
Injection quantity - low idle	Performance variance < 0.30	Original equipment standard	Performance variance < 1
Injection quantity - economical test point	Performance variance < 0.5	Original equipment standard	Performance variance < 1
Injection quantity - maximum power	Performance variance < 0.4	Original equipment standard	Performance variance < 1
Injection quantity - pre-injection	Performance variance < 1.2	Original equipment standard	Performance variance < 1
Injection response	Response time range ± 50us	Response time range ± 50us	Response time range ± 100us
Durability and performance	Original equipment standard	More than 1000 hours / 90 days	Less than 500 hours
Anti-rust standard	—	Up to 18 months' anti-rust protection	—

Production technology advantages

Item	Original equipment standard	Delphi	General domestic brands
Production and testing equipment	Original equipment standard	Original equipment specifications	Older domestic P- and S-nozzle equipment
Geometrical dimensions	Original equipment standard	Equivalent to the original equipment	—
Cleanliness	< 3 particles each	Equivalent to the original equipment	Not controlled
Nozzle needle and body compatibility	± 2 micrometers	Equivalent to the original equipment	Large dispersion, inconsis-tent clearances
Surface handling	DLC coating	DLC coating/hardness equivalent to the original equipment	Few carbonized parts, most parts not carbonized
Anti-rust control in the process	Original equipment standard	Equivalent to the original equipment	Not controlled

Delphi

Channel Service advantages

Before sales

- Detailed marketing materials
- Professional maintenance guides
- Comprehensive product solutions from parts to tools and equipment

During sale

- Sharing of latest market trends and information
- Market development assistance and sales support
- Large service network system to support the distribution channels

After sales

- Rigorous and objective after-sales service process
- Professional and timely technical guidance and support
- Authoritative testing standards and equipment
- Responsive and professional after-sales team
