Features enhancement

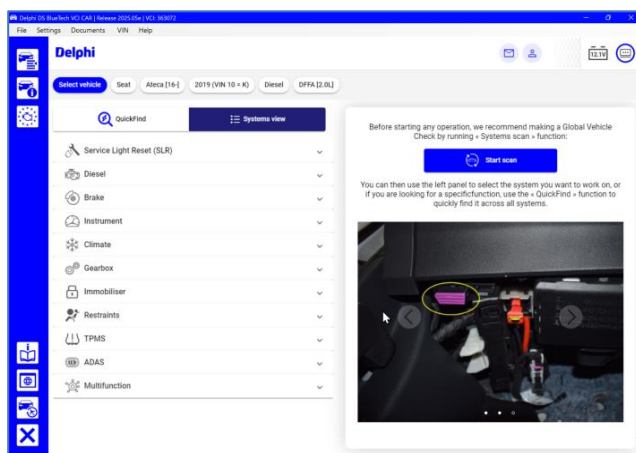

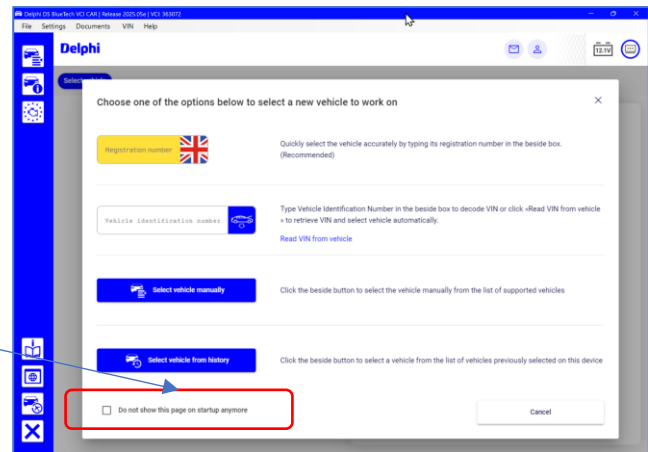

New landing page & vehicle page

The landing page has been revised to propose all the possible methods for selecting a vehicle in one dialog box:

1. Registration plate*, in the countries it is available**
2. VIN: the user has the possibility to manually type the number or to get the software read it from the vehicle
3. Manual selection of the brand, model, year
4. Selection from the history list (vehicles previously diagnosed)

The user has the possibility to hide this landing page at startup

New vehicle page

For better clarity, the action button and details are displayed in a separate card.

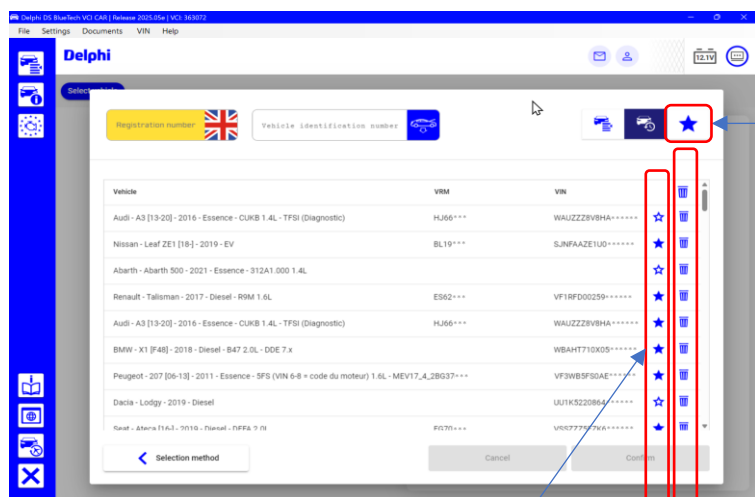

- The left-hand side is dedicated to selection of systems or functions
- The right-hand side is dedicated to details and actions

*: At license expiry, the identification by Registration Plate is not available anymore.

** : As of 2025.05, the VRM functionality is available for UK, France and Italy

History Bookmark and Delete

From 2025.05, it is possible to bookmark and delete the history of the vehicles diagnosed.

Bookmark filter icon:

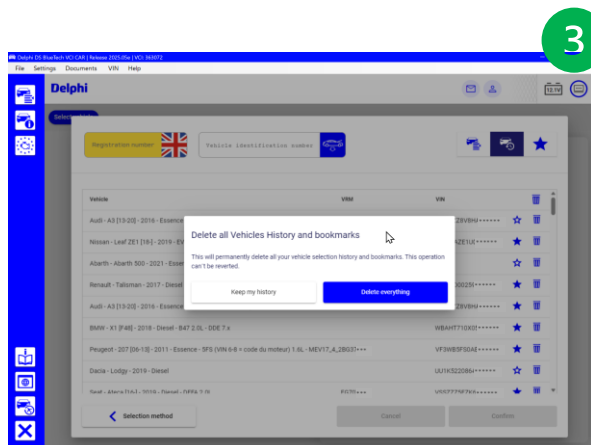

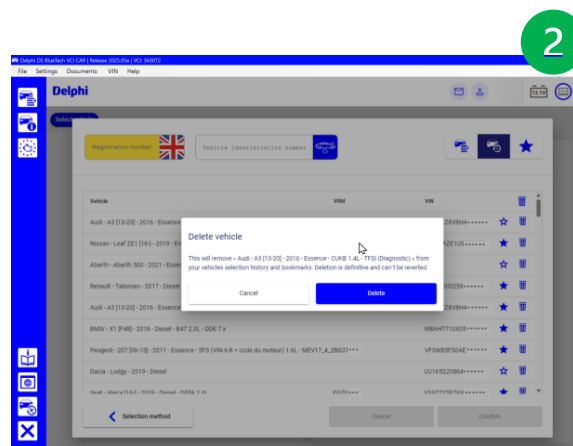

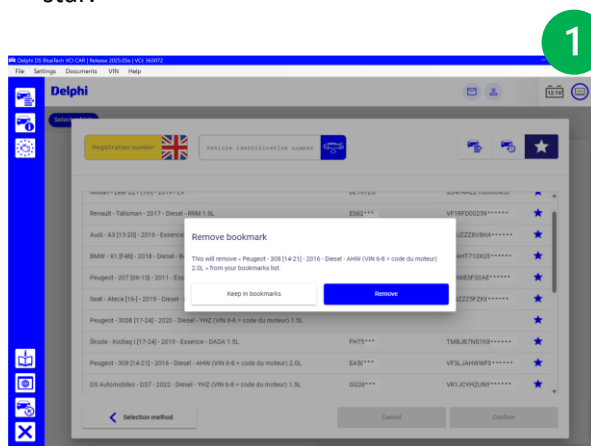

When pressed, the whole list of vehicles is filtered by « bookmarked » items. See below

Bookmark icon:

It is possible to add and remove (pic. 1) bookmarks by clicking the star.

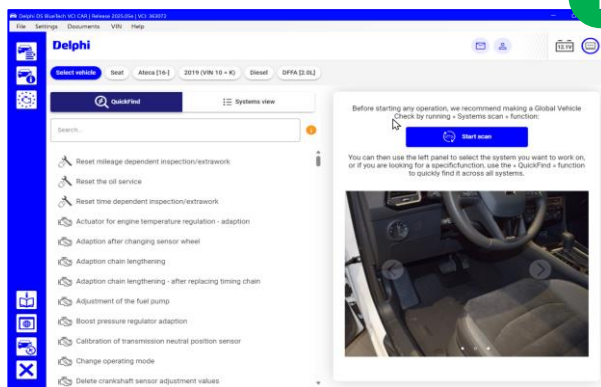

Delete icon:

It is possible to delete individual lines (pic. 2) or the whole list of history (pic. 3).

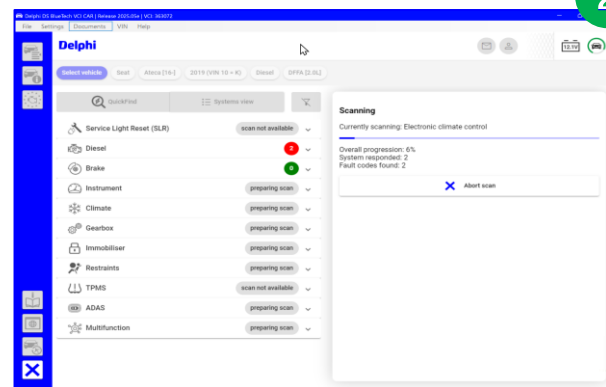

QuickFind function updates

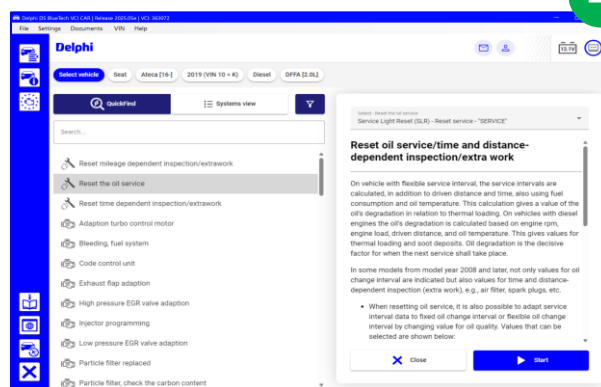

To keep only the supported functions for a given vehicle, the results of the QuickFind are automatically filtered after a System Scan. However, if the user wishes, it is now possible to remove the filter in order to access all the functions that could potentially be executed.

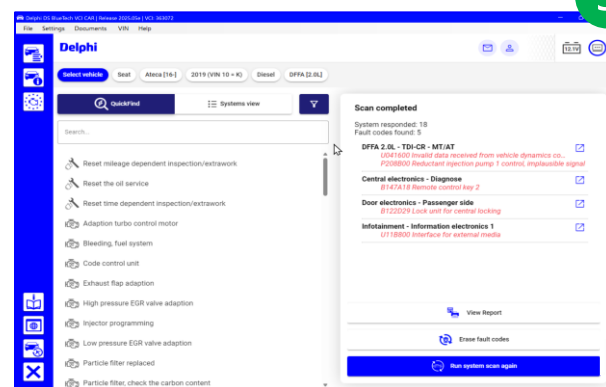

QuickFind without filter

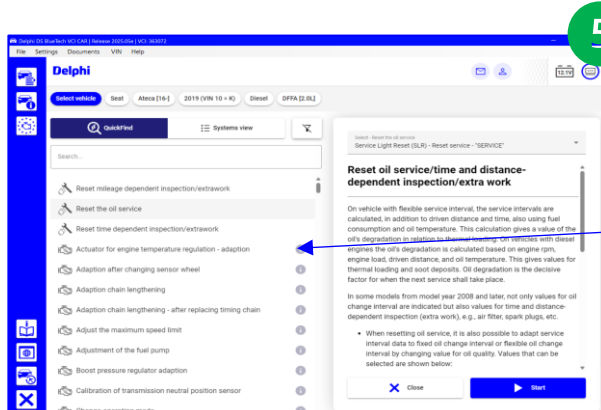

System scan running

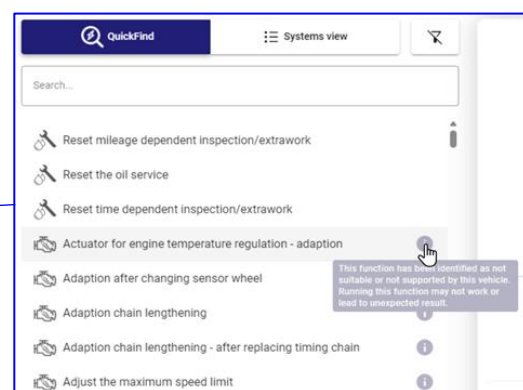

QuickFind filtered with function details

QuickFind filtered after the scan

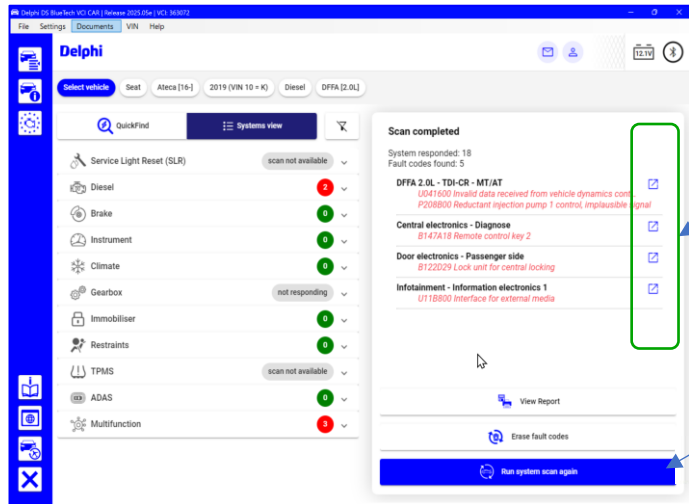

QuickFind filter can be removed, and the details of the functions can be viewed.

QuickFind filter tooltip

Scan results improvement

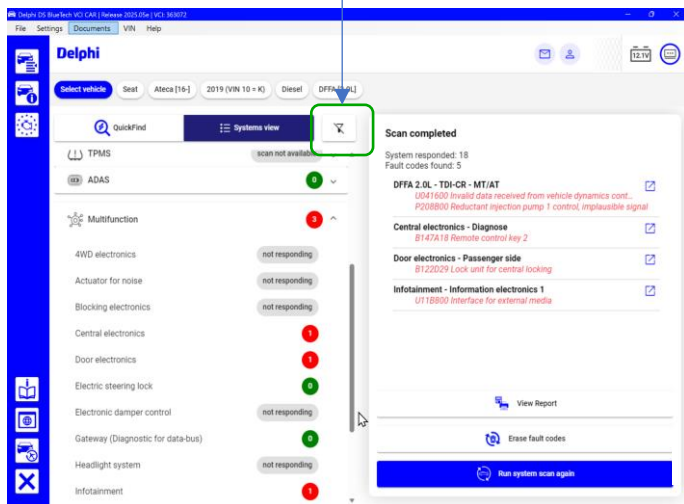

Clickable scan results are now possible from 2025.05

Repeat the scan of the vehicle systems

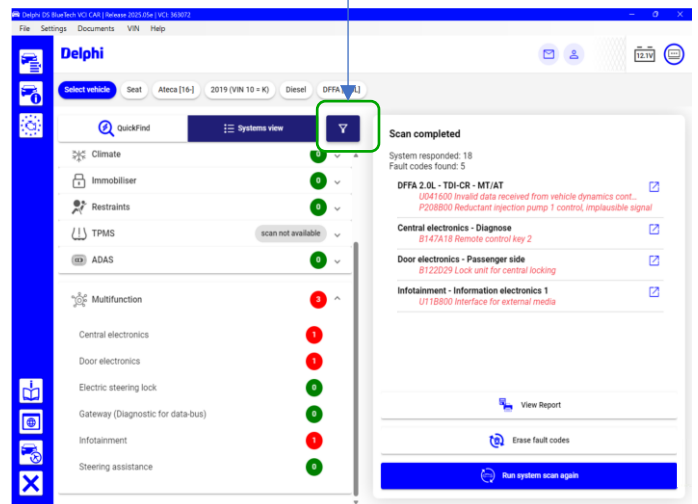

Filter OFF

All systems are displayed, included those that haven't responded

Filter ON

Only the systems that have responded are displayed to the user

New functionalities

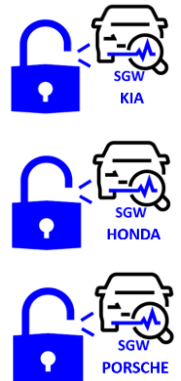

Kia / Honda / Porsche Security Gateway

1- Description:

The DS tool now offers the users having a **valid BlueTech license**, the possibility to access the protected functions and fully diagnose the Kia, Honda and Porsche vehicles fitted with the Security Gateway. This includes, but is not limited to, components activation, test components, perform adjustments, coding and calibrations...

This is a fully integrated functionality, to be activated in the DS software Security Gateway portal.

2- Brand activation process:

Refer to the section 1.8 of the Technical Bulletin **DT700**, available in Direct Evolution.

Action required:

Access your Security Gateway portal from your DS software menu and activate the 3 new brands now.

When you see this dialog box, please click "CONFIRM"

Brand activation

By enabling this brand you could be required to purchase an additional license. A sales representative will review and potentially contact you by phone or email to proceed with the activation process.

Confirm

Cancel

3- Examples of vehicles*

KIA:

Up to to 2024 Models: Picanto, Rio, Sportage, Stonic

HONDA:

Up to 2024 Model: HR-V

PORSCHE:

Up to 2023 Models: Cayenne 9YA, Panamera 971

*: list not exhaustive

Security Gateway: brands coverage:

Below is the DS software capability for Security Gateway, as of the version 2025.05.
Access to Security Gateway protected vehicles requires a valid DS software license.

Brand	Integrated solution	Requires additional component	Included in the BlueTech license price	Add-on license
