What our customers tell us...

“ The Delphi Technologies diagnostic tool is a very good system ... it's easy to set up and install the software, which is an important part of diagnostic equipment. Time is money! ”

Advanced diagnostic solutions

ADAS calibration

Delphi Technologies' multi-brand, modular Advanced Driver Assistance Systems (ADAS) equipment and DS diagnostic software with integrated OEM procedures delivers garages a cost effective, flexible and accurate route into ADAS servicing.

The Delphi Technologies ADAS solution:

Easy storage

save storage space with removable half-bars

Double-sided target panels (OEM approved)

save space and money in the workshop

Adjustable equipment

designed to cover even the largest vehicles

Accurate positioning

calibrate the ADAS sensor with confidence

Single person operation

operate the equipment with only one pair of hands

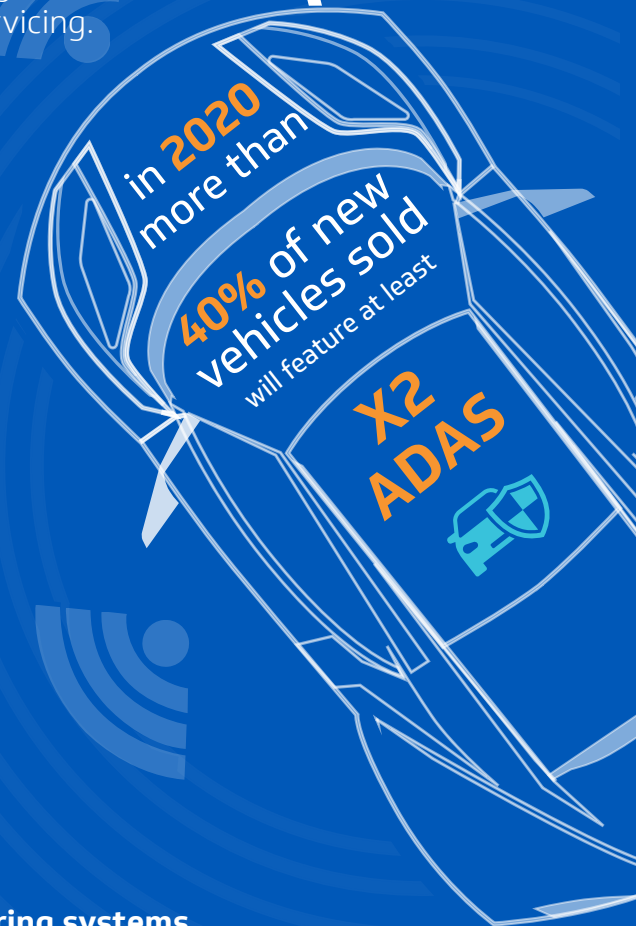

Parallelism adjustment

fast, easy and accurate cross-bar adjustments

Adjustable wheel clamps with self-centering systems

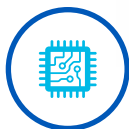

whatever your requirement, we've got it covered

Advanced diagnostic solutions

Grow your revenue in a flash

Our **DS-Flash™** **pass-thru package** does what its name suggests – it allows garages to ‘pass-thru’ to vehicle manufacturer’s websites to access valuable repair and maintenance information.

Advanced diagnostic solutions

Accessorize your capability

Comprehensive: extensive range of manufacturer specific cables for added functionality and practicality

Flexible: available as individual cables or kits

Multi-sector: cables supporting car, truck, van and trailer applications

Future-proof: support for Diagnostic over Internet Protocol (DoIP) technology

For the **complete diagnostic capability**, Delphi Technologies offers a range of vehicle manufacturer specific OBD cables for **car, truck, van and trailer**. These can be purchased as part of a kit, or individually – whatever you prefer.

Comprehensive technical information... ... at your fingertips

Today's intelligent automotive technology requires an equally intelligent approach to diagnostics and servicing. Access to high quality, in-depth technical information is a must.

Provides adjustment data, maintenance schedules, manuals, technical drawings, repair times, and much more!

Ability to select a vehicle by make, model, registration number and VIN

Includes Vehicle Manufacturer Technical Service Bulletins and approved fixes by industry professionals

Extensive library of technical information for all major vehicle systems

Coverage of all leading European, Asian and American makes and models in the European vehicle parc

Welcome to Delphi Technologies' Vehicle Technical Information (VTI)
