Why Choose Delphi?

Delphi continues to build on its OE heritage with the launch of its latest turbocharger range, engineered to deliver dependable performance, precise fit, and long-term reliability.

This expanded offering reinforces Delphi's commitment to providing workshop-ready solutions that meet modern vehicle demand.

Delphi turbochargers are engineered for precision, efficiency, and durability. Designed to operate under increasingly demanding engine conditions, Delphi turbochargers deliver enhanced engine efficiency and power while maintaining OE-level fit and function.

Each turbo is manufactured to exacting standards to ensure optimal boost control, consistent performance, and extended service life.

By combining robust materials with proven design principles, Delphi turbochargers support reduced emissions, improve drivability and reliability, making them a dependable choice for today's high-performance and boosted efficiency engines.

Passenger vehicle & light commercial vehicle

Bus, M&H commercial vehicle

Off-highway applications
