

Delphi

INTERCOOLERS

ENGINEERED CHARGE AIR COOLING SOLUTIONS

Delivering performance, durability, and efficiency trusted
by vehicle manufacturers and the global aftermarket.

Delphi

Delphi intercoolers are engineered to effectively manage charge air temperatures, supporting engine performance, fuel efficiency, and emissions control.

- Designed to meet or exceed OE specifications
- Provide optimised thermal efficiency for modern turbocharged engines
- Robust construction for demanding operating conditions
- Direct fit for straightforward installation
- Consistent quality backed by global OE expertise

Comprehensive Vehicle Coverage

The Delphi intercooler portfolio supports a wide range of passenger and commercial vehicles, including:

- Passenger cars and SUVs
- 4x4 and light commercial vehicles
- Diesel and petrol turbocharged applications
- Coverage includes popular vehicle makes such as: Audi, BMW, Ford, Holden, Hyundai, Isuzu, Mazda, Mercedes Benz, Nissan, Toyota, Volkswagen and more.

Engineered for the Aftermarket

Delphi intercoolers are developed for performance and durability:

- High efficiency core design to maximise heat transfer
- Corrosion resistant materials for extended service life
- OE style mounting points and hose connections
- Validated to withstand thermal cycling and vibration

This ensures confidence for installers and reliability for end users.

The Right Choice for Charge Air Cooling

Delphi intercoolers bring OE heritage to the aftermarket, helping workshops and distributors deliver dependable repair solutions.

Choose Delphi intercoolers for:

- Trusted OE engineering
- Broad vehicle parc coverage
- Reliable performance and fit
