On-vehicle electronic diagnostics

The Delphi Technologies difference

Advanced diagnostic solutions

Intuitive solutions delivering professional diagnostics, **ADAS calibration**, pass-thru, and much more!

Perform the most complex jobs with ease

Comprehensive technical information

Vehicle technical information (VTI) combining essential repair data and technical drawings.

Everything you need, at your fingertips

Leading multi-sector coverage

Leading coverage for car, LCV, truck & bus applications and 16 key vehicle systems.

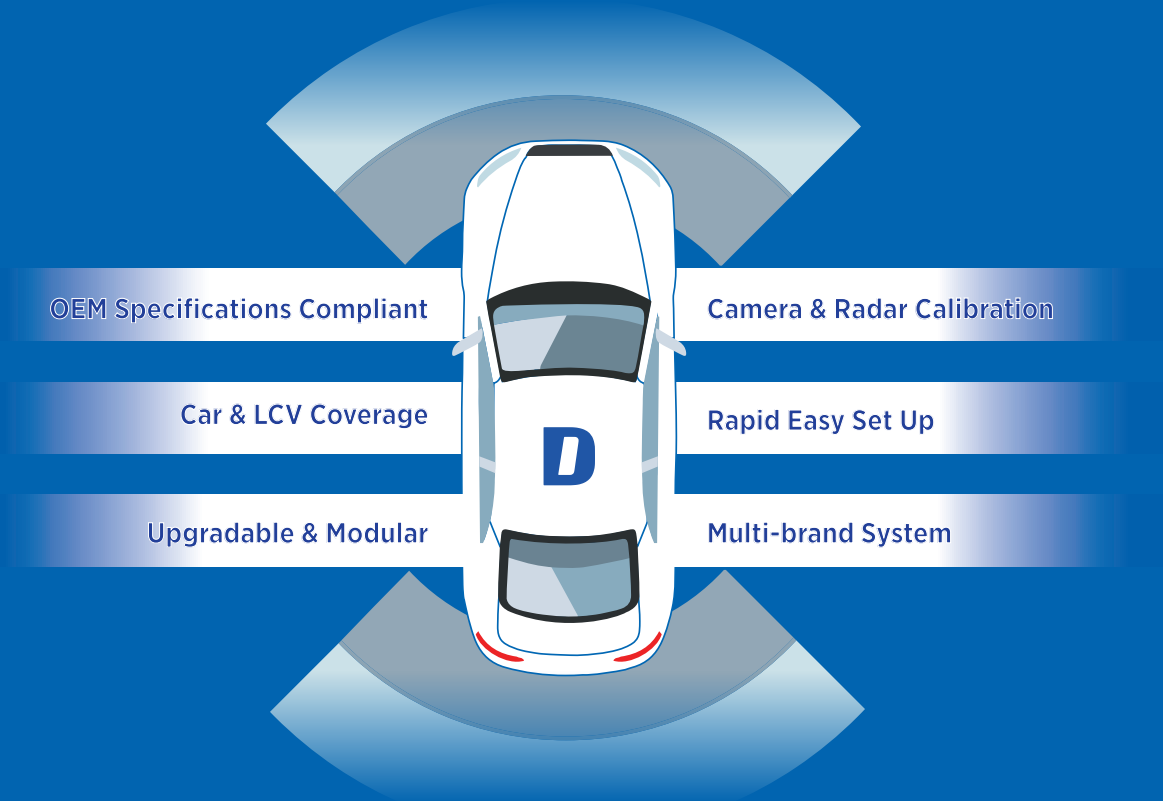

One hardware solution, multiple sectors covered

Advanced diagnostic solutions

ADAS by Delphi Technologies

Delphi Technologies' Advanced Driver Assistance Systems (ADAS) calibration solution provides a comprehensive and easy to use system allowing the workshop to confidently and reliably calibrate sensors to OEM compliant specifications.

Today's vehicles can be equipped with over 10 different types of environment monitoring functions, utilizing different types of detection methods & sensors. These are essential functions for both safety & comfort in the modern car and can need calibrating as a result of diagnostics, service, replacements, and repairs.

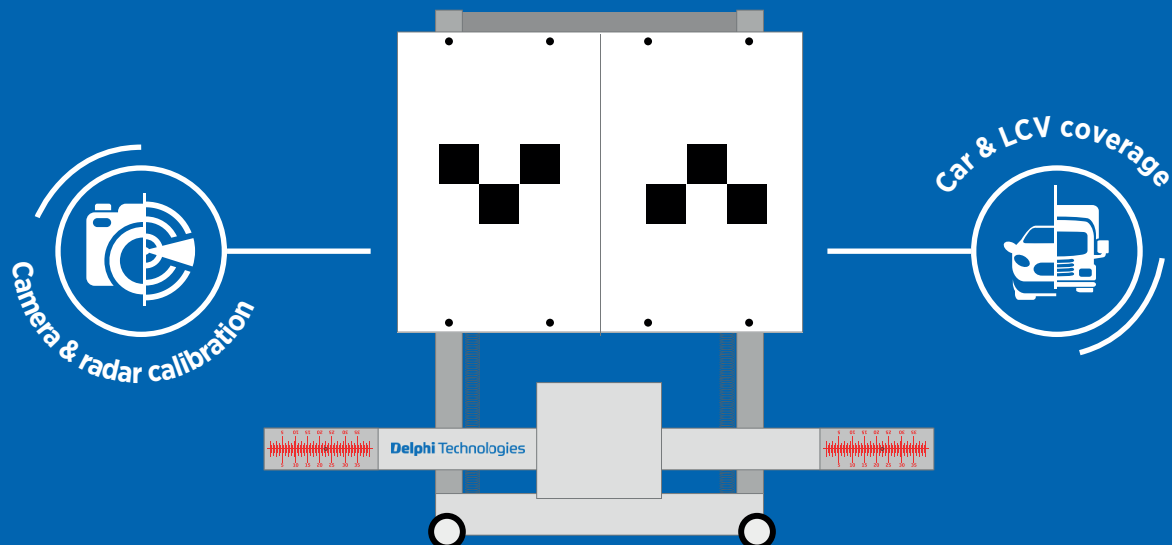

Advanced diagnostic solutions

ADAS calibration

Designed to provide safety and comfort while driving, Advanced Driver Assistance Systems (ADAS) are becoming increasingly common in today's latest generation vehicles.

Following any repair work on the steering, suspension, bodywork and more, it is critical to conduct an ADAS re-calibration in order to avoid issues such as poor handling, irregular tyre wear, an uncomfortable ride, and reduced vehicle safety.

Delphi Technologies' multi-brand, modular Advanced Driver Assistance Systems (ADAS) equipment and DS diagnostic software with integrated OEM procedures delivers garages a cost effective, flexible and accurate route into ADAS servicing.

The Delphi Technologies ADAS solution:

Easy storage

save storage space with removable half-bars

Double-sided target panels (OEM specification)

save space and money in the workshop

Adjustable equipment

designed to cover even the largest vehicles

Accurate positioning

calibrate the ADAS sensor with confidence

Single person operation

operate the equipment with only one pair of hands

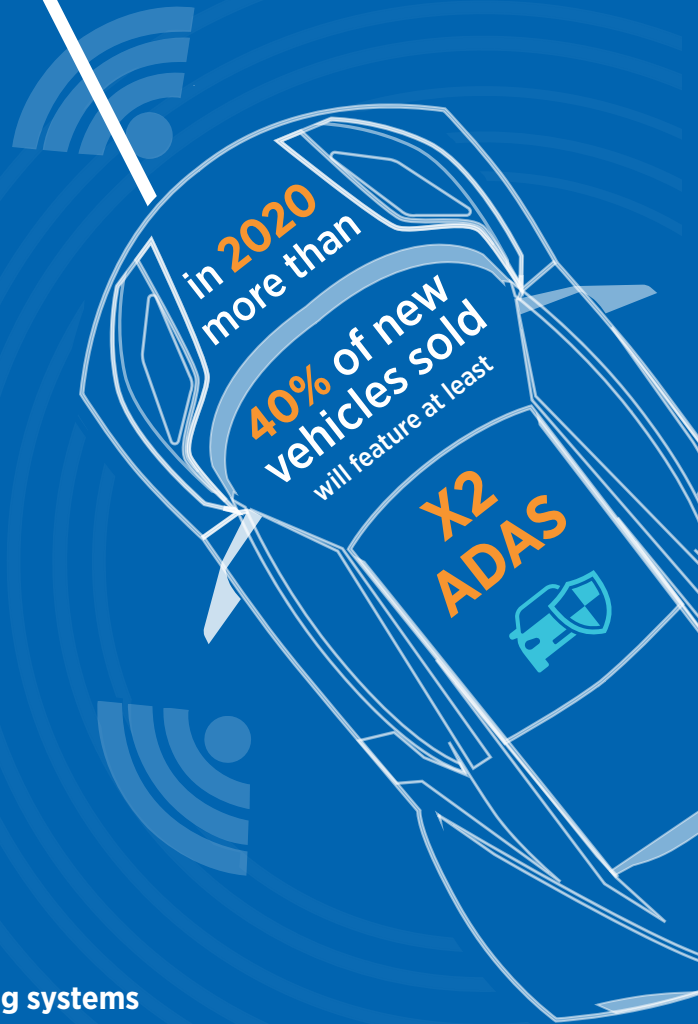

Parallelism adjustment

fast, easy and accurate cross-bar adjustments

Adjustable wheel clamps with self-centering systems

whatever your requirement, we've got it covered

Camera Calibration includes front, rear, 360° overview, and night vision cameras. Our continuous improvement program means our coverage will expand with subsequent software developments.

Advanced diagnostic solutions

Calibration for safer vehicles

Our extensive calibration coverage includes static and dynamic variations. The powerful combination of static in workshop and dynamic on the road calibrations means you can diagnose, repair, and recalibrate the full range of ADAS related features a car may have.

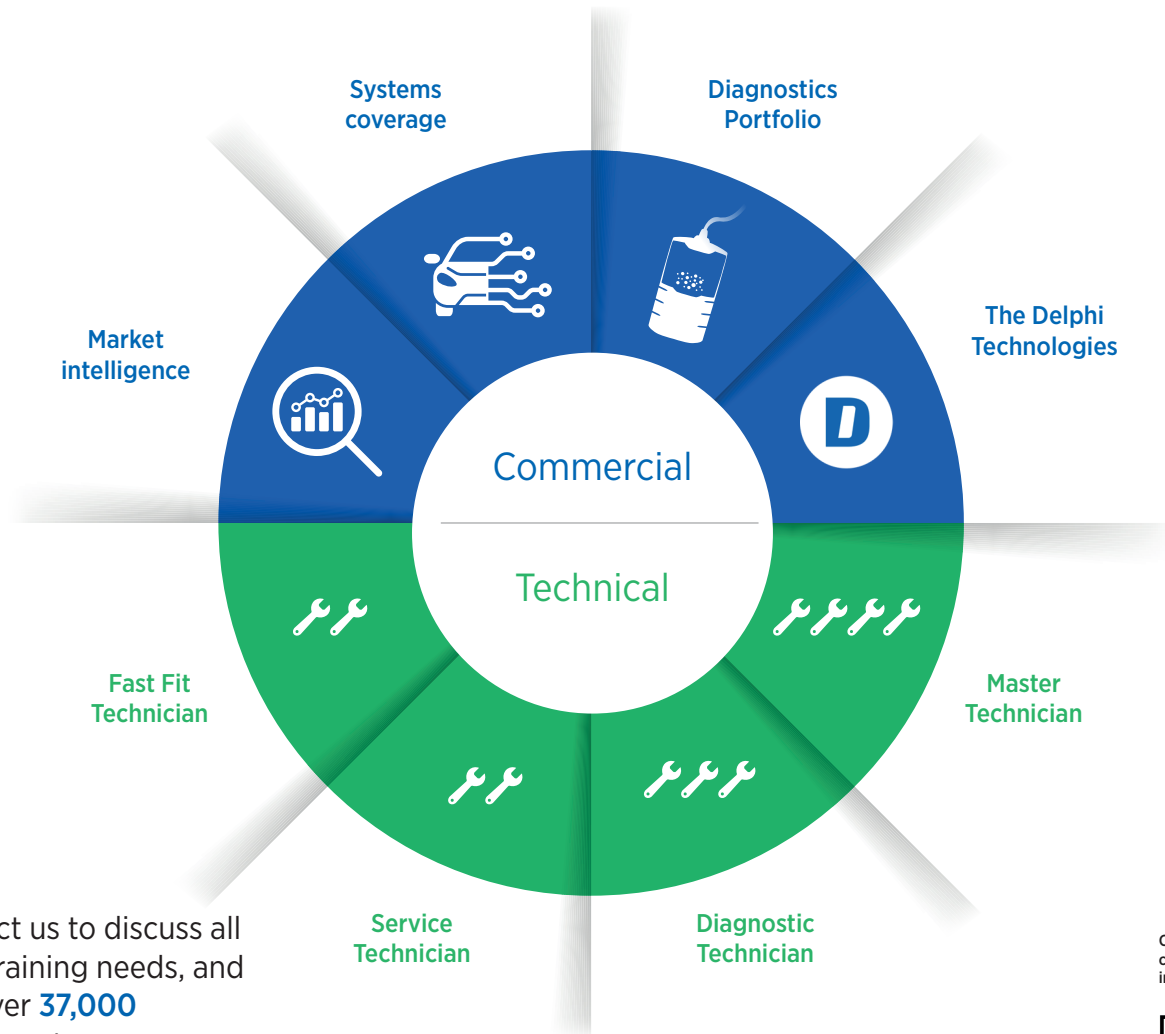

The Delphi Technologies ADAS calibration solution

Let us help you empower safety and drive your workshop to the future!
